2. Citations and explanations (Rule 70.7)

The present invention relates to a packaged pet food product comprising at least two slices of a meat or meat analogue in a sauce or gel arranged in a rigid or semi-rigid container in a stacked or shingled relationship side by side.

The following documents cited in the International Search Report were considered for the basis of this report:

D1 WO 2000/069276

D2 US 5869121

D1 discloses a meat analogue which can serve as a meat extender in canned pet food products. The document does not disclose a sliced meat analogue arranged in a shingled relationship side-by side.

D2 discloses a sealed pet food product comprising fried pieces of a layered gel matrix with a meat-like appearance. The fried pieces are filled into a container rather than arranged side by side.

In light of the documents cited in the International Search Report, the invention of claims 1-14 meets the requirements of Article 33(1) PCT, ie. it appears to be novel, to involve an inventive step and to be industrially applicable.
